

Hello,

I want to express my view on lowering the voting age.

The current age of 18 years is as low as it should be.

We should not allow young minds which are still developing influence our government.

In addition most people under 18 do not have a 'buy in' to our state and levels of government. With no financial or organizational ties the young people concerned may see things without considering impact.

Allowing young teen agers to vote will create multiple errors of unintended consequence.

Thank you,

Robert and Teresa Stevens
