

PLEASE SUPPORT THIS LEGISLATION:

[SB 283](#) would require the board of education and the Oregon Health Authority to review independently funded studies relating to the biological effects of microwave radiation from wireless technology in schools. It would also require schools to begin teaching kids how to use their wireless devices more safely.

ALSO:

NO GREEN NEW DEAL WITH 5G! STOP DEADLY 5G MICROWAVES FROM FRYING LIFE ON EARTH!

I want to bring to your attention one of the intentions of the Green New Deal that needs to be deleted because it is encouraging the worst invisible pollution there is: 5G, smart meters, etc. Here is what the Resolution says. You will find it starting on Line #14 on page 7:

14 (D) building or upgrading to energy-efficient,
15 distributed, and **“smart” power grids,**
16 and working to ensure affordable
17 access to electricity;

So the Green New Deal is promoting "smart" power grids which include "smart meters" and 5G. As you know, **smart meters have not been approved. Smart meters have no surge protectors to stop unnecessary surges of energy to travel through your wires to your appliances** of which over 400 fires and explosions (including a few in Paradise California) have already been proved to be started by the meters; PG&E had to finally admit before a state senate committee that more than 43,000 of its digital meters have suffered from various problems -- 9,000 didn't work and another 23,000 meters were installed incorrectly.

No more Privacy Rights: Meters gather private data 24/7: Digital meters can tell and record what television show or DVD you are watching, what you are doing on the computer, what appliances you are using and when of which utility companies have admitted that they sell to other corporations. It's called **Corporate Surveillance**. They have even admitted that they make more from selling the data than from what your electricity bill amounts to. Furthermore, a remote shutdown can occur as well as being able to control your appliances, including the computer and other appliances. This includes if your neighbor has a meter and you don't. Your neighbors meter can gather data and shutdown your appliances as well.

Very easy to hack.

Costs double and triple: A woman who lived in Fremont, CA was astounded when her electricity bill was \$2,000 a month after a meter was installed. She and her family were used to paying around \$500.

Can cause Cancer, possibly ADD, ADHD, AutoImmune diseases and a plethora of other illness: The radiation levels cause cancer as well as "leaky brain" because the frequency breaks the blood barrier in the brain. I'm sure you're aware of these problems.

So the Green New Deal supports 5G is not all it's cracked up to be. There are a lot of good things in it, but there are some resolutions that need to be changed or they need to be clarified because they are too vague and can do more harm than good.

I cannot and will not support it. I think you should, reach out to Cortez and any other politician and inform them of the dangers of smart grids, how many hundreds of law suits are out there against them, and how this segment in the Green New Deal is NOT green at all, but life-threatening in the long run, and not needed. This segment needs to be deleted.
