

Hello,

This bill will add yet another detrimental barrier for small business! This bill is ridiculous. Our society is already lazy enough and extremely government dependent. Many people want a handout and its getting worse all the time. I already deal with employees who say " I can only work a few hours a week because otherwise it will affect my benefits," or "I make as much on unemployment so why would I work? ". This is the mentality of not all, but many people out in the work force. Adding more freebies and self entitlement will lead the to destruction of this great country. The abuse this program will lead to makes me sick. I vote NO on House Bill 3031 and I hope you will too.
