

Jordan Sinn <jordan@earthlighttech.com>

Dear to Whomever This Concerns,

My name is Jordan Sinn and I manage a small solar contracting business in Silverton, OR. Over the last few year, three times we have went through many hurdles to inquire, design, propose and win solar projects for schools fulfilling the 1.5% rule. All three of the “won” projects ended in severe disappointed as either the G.C. or the school board decided a project was over budget and the solar system was discarded. It seemed as though there was no accountability to fulfill this requirement. It makes our company leery to put in the time and efforts for future 1.5% projects. Thank you for hearing my concern and Testimony. I can provide more details on each project if needed.

In Service,

Jordan Sinn | G.M.

1037 Commerce Ct. Silverton, OR 97381 | office 503-874-4142 | mobile 971-218-6374
