No amendment.

BACKGROUND:

According to the Centers for Medicare and Medicaid Services (CMS), Medicaid is the largest payer for mental health services in the United States and plays a significant role in the reimbursement of substance use disorder services. CMS states that individuals with a behavioral health disorder utilize significant health care services with approximately 12 million visits to U.S. hospital emergency departments in 2007 that involved individuals with a mental disorder, substance abuse problem, or both.

House Bill 3279 establishes payment parity for services provided by mental health and substance use disorder professionals in Medicaid.
