*Local Counsel for Plaintiffs*

**United States District Court**

**District of Oregon**

**Portland Division**

**AHM**, by and through  
her Guardian *ad litem* and father,  
David Mark Morrison, and  
David Mark Morrison, individually,

v.

**Portland Public Schools,**  
Defendant.

Civil Action No. 3:11-cv-00739-MO

**Declaration of Barry Trower**  
**Addendum A**

Child 'A' } Possible damage to first and subsequent generations.  
5-16yr.

⇔ ≈ 25 years ⇒

Child 'B' is now pregnant adult: child C

micro wave irradiation can cause oxidative or nitrosative stress to mitochondria ⇒ this DNA is 10x more susceptible to low level chronic microwave radiation than other DNA ⇒ Low histone protein content

ovaries = 400 000 follicles  
≈ 400 to mature = 14 each cycle to form egg of which one will/can be fertilized  
N<sub>2</sub> or O<sub>2</sub> is essential for Brain/Immune System

any DNA damage is irreparable and can pass to every female hence forth.

child 'C' : every aspect of child 'C's life has been at maximum risk from stages ① and ② and ③

many have already been irradiated from wi-fi.

••• The greatest risk is yet to come.

Rispest danger from school wi-fi irradiation on students & teachers

**Note:** 1st. 56d is when all embryos are most vulnerable.

Child 'B' (Foetus) 100 days for follicles to form: no defence structure. (with possible DNA damage) there 150+120d. to mature.

No protein 53 (XIV) to fight radiation  
No nuclear core complex (X30) proteins: for defence.  
No factor 1 protein (apoptosis)  
of 100 000 protein structures only 600 are known.

DNA damage

Td = 100 cells } body is initially inside-out i.e. major organs are those most irradiated.  
28d = heart }  
40d = eye }  
47d = fingers/feet }

photo sensitive ganglions: absorb rad: affect body functions.

body may not know she's pregnant at this stage: hence no precautions.
