---

To the Gentleman and Gentleladies of the Oregon Legislature,

I'm writing to you today as a concerned Oregonian Parent, TaxPayer & Voter. I urge you to move SB801 forward in the legislative process. I'm from a long line of Teachers and believe you can't go wrong with education. With all the attention to firearm issues in this country and the complex, expensive & politically explosive solutions being posed, SB801 is a feasible, logical and affordable way to actually do something. Something that will assuredly save children's lives. Not unlike simple fire drills. It's time to take action for the safety of our kids. The Partisan posturing, pandering and patronizing must end. Don't be swayed by special interest groups, they didn't elect you, we did. Our children deserve better than that. You have the opportunity to make a change that costs so little and it'd only have to save 1 life to be exponentially worth it.

Again, I strongly urge you to support and even strengthen SB801.

Respectfully, Daniel F. Dills, Eugene Oregon.
