

This is one of the dumbest proposals I have ever heard. Kids eat tide pods at this age.

These kids can't make educated decisions on their own for so many things (contracts, smoking, drinking) yet we think they can make an educated decision on voting. I am sure some can but the majority are going to "follow the leader" and vote by who their parents or friends tell them without any skin in the game or consequences for bad decisions.

Thanks,
