

Please support SB 352 to help Tucker Maxon School. For over 72 years, Tucker Maxon School has been helping children who are deaf and hard of hearing reach their full potential in life. How do I know this? My third son attended Tucker Maxon years ago, and because of the support and education he received from this small non-profit school, he is now a platform test engineer at Intel, working with people all around the world--a successful, contributing member of society. This tiny school does amazing work even though it receives no state funding, and makes miracles happen every day. Won't you please vote in support of SB 352? This is a one-time financial request to replace the HVAC system for the school, which is at a breaking point. Band-Aid repairs this winter alone have cost over \$12,000 but the problems are never over when your system is 65-years old. The old system also wastes fuel and money. Please help this gem of a school, and its students, succeed for another 72 years by supporting SB 352.

Thank you for your time and support,

Sandy Axel
