Dear Chair Dembrow,

Please protect our farm land and environment from development. Also, please protect our wild life, open spaces, rural communities and hard working stewards of the land.

If you want to be green, SUPPORT farmers... we love the Earth. It is where our livelihood comes from and our hearts lay! Stop development, protect farm land and food source. The world population is to increase, as will the need for food. Please quit threatening the businesses who only want to serve the world with food with ludicrous policy - one day the nation will wish it hadn't.

Sincerely,

Quincy Warner
