

SB 978 and its asinine -1 amendment is another tragedy of intellectual dishonesty and backdoor attempts to plainly restrict self-defense and civil rights. Who composes these bills which lay out 'gun-safety' measures which have no substantiation or proof of any efficacy? They are not crafted with any meaningful understanding or knowledge of the issues of gun safety, but merely serve as an irrational and emotional band-aid at best and at worst facilitate the erosion of civil rights and damages our constitutional republic.

These bills are malignantly naive and effectively negligent of the best interests and basic human rights of Oregonians. If they are passed then legislators such as yourselves only continue to lose integrity and trust, while the law abiding gun-owning citizens who we need to be active members in our society, for our collective well-being and maintenance of our unalienable rights, are the only victims.
