

I oppose HB3063, this would greatly impact our low income family, taking away our Religious freedom exemptions. Our autistic son would no longer be able to receive the special education services that he needs! As we are already a low income family reducing us to one working parent if we have to home school. I do not see our family continue to live in the state of Oregon if this bill passes. Please I beg you vote NO on HB3063!

I am NOT okay with forfeiting our religious freedom rights to choose whether or not we subject ourselves and our children to potentially harmful injections.

To ask me to forfeit my rights and allow the state to mandate a medical procedure that could potentially harm, injure or cause death of my children is unconstitutional and abhorrent and feels less like a democracy and more like a totalitarian state.

I am AGAINST mandatory vaccinations!
