

RE HB 3094- Pls. support it. It is wasteful to heat the great outdoors. Conservation is still our major new energy source.

I am also particularly concerned that tenant occupied properties especially are often not insulated.

I have a lawyer friend who paid \$500 a mo in the winter months because his house rental not insulated.

We need to provide incentives to owners to do so OR MANDATE THAT.

Thank you for continuing the work in which many of us were engaged 50 years ago!
It is past time to finish it. Also some houses need- re-weatherized: coons+ have torn out insulation in some areas!
