

To: Chair Rep. Helm, Vice-Chairs Rep. Reschke and Rep. Schouten and members of the Committee

From: Anne Nesse, Director <http://SustainableEconomiesNW.com>

I represent a growing group of scientists and individuals that are quite aware we must support many new laws, that are based on living with more renewable resources, on a finite planet.

I am testifying in Favor of HB 2322. And I would like to compliment Rep. Helm and Rep. Marsh for bringing this Bill forward.

Climate change requires massive reorganization of our current systems, that will require many adjustments by our Land Conservation and Development Commission. So many changes in fact that many of us wish we could make all these changes with even more speed.

Perhaps some additional persons on this Commission, working harder, can speed this process along. I am willing to help in any possible way.

Thank you,  
Anne Nesse
