

I strongly oppose SB770, the OHA takeover of private healthcare.

Oregon is going WAY to far out of line on all these medical Bill's. Government has no right to mandate anything that goes into our bodies, especially neurotoxins.

Public school teachers already have a hard time with children who have behavioral and learning disorders. It will only get worse. Teachers are striking because of budget cuts. You take away 31,000+ students rights to attend schools means the \$13,000+ per child the state awards schools will be depleted drastically. That's nearly \$413M Oregon schools will lose.

Many families will be forced to leave Oregon. My family will gladly leave our home state. Majority of Oregon are conservative, excluding Portland and Eugene. We do not approve on HB3063 or SB770. You are introducing Bill's that go against many federal & STATE constitutions. Seems like many of our legislators in Oregon need to revisit Oregon's constitution, or resign if they dont want to uphold the very thing they swore to do.

Sincerely,

Tiffany Bristow

A very rightfully upset American citizen and Oregon native.
