

I strongly oppose bill 770 and HB 3063. To give OHA the right over our bodies and healthy care is against our right as citizens. Pro choice is being fought for so women may have abortions and end a life of a baby but you want to force vaccines on everyone. Is there no pro choice for that.

You may spin it how you see fit but immunocompromised people could die of the flu or a cold.

Medicine is not one size fits all if one drug works for someone but not others we don't force them to keep taking it. When will this over reaching of government stop. Vote no on both these bills. This takes away the rights of people and it is sick. Healthcare for all yes. Healthcare for all controlled by OHA NO! OHA should not have as many rights as they do. Is it not a government by the people and for the people not by the money and for the money. Everyone in the senate is so greedy. You work for us! Not the people who throw the most money at you so they can pass there agendas. What is right for some is not right for all. Don't take away our freedom.

Sincerely,

Lyndsi H.
