**Subject:** Senate Bill SB 926

Chair Dembrow and members of the Committee - Please do the right thing and support bill SB 926. Aerial spraying of herbicides has no place in Oregon. Do we not care about its affects on groundwater, drinking water, wildlife or humans ? There is a good reason that aerial spraying of herbicides on Federal lands was curtailed decades ago. Why is it still allowed on state and private lands in Oregon other than the desire to make more money in a way that endangers a healthy environment.

Thanks - Dave Maize - Cave Junction, Oregon
