Subject: Aerial Spraying--stop it

- SB 926 would stop aerial spraying over state owned forest lands.
- SB 931 would require better notification and reporting of sprays in the FERNS public database.

I live on the Oregon Coast, outside of Florence. Our water source is an open lake that is adjacent to areas that are sprayed. I am concerned about the over spray and run-off from spraying all harvested areas. Please take a step and stop aerial spraying over state lands!

Thank you.
