Subject: SB 936 and SB 931

Senators:

Please support passage of SB 936 and SB 931.

SB 936 bans aerial spraying over State Forest Lands. I think that aerial spraying should be banned over all forestlands in Oregon, not just state and federal lands. It is an egregious practice that poisons rural residents and their drinking water all over western Oregon. SB 936 is at least a start on furthering the ban on aerial spraying.

SB 931 requires better notification and reporting in the FERNS database. I support this over what is currently in place, but in reality, I don't think there should be any aerial spraying on forest lands, and then notification wouldn't be necessary.

Sincerely,
David Tvedt
