**Subject:** SB926

Chairman Dembrow,

Instead of setting an example of responsible logging practices, aerial spraying on State Forest Land is sending **exactly the wrong message, i.e.** that it is okay to expose the entire ecosystem to chemicals that are harmful to all species including humans, especially since it is impossible to prevent drift to adjacent land. It is poisoning people and our water. [That's why I vigorously support SB926.](#)

Thank you,

Carolyn Eady
