

Committee Chair, Vice Chair, and Members

We strongly oppose SB 978! We urge the committee to not go through with this attack on our Second Amendment rights! This bill, if it becomes a law, will not protect us but will harm us. This will not allow ourselves to be or feel protected at all but instead will give the common criminal an upper hand that currently they do not have. If you believe, with this bill, or any other gun bill that removes my rights will protect me then you just don't understand how the criminal who carries thinks. They will not abide by these laws and in fact they will look for laws such as this to carry out their bad deeds. With this as a law Oregonians will be faced with more criminal activity instead of what this bill is intended to do. Please consider other large cities and states who have restricted the Second Amendment rights for their citizens. You will find that crime rates have increased.

Respectfully,
