

I am completely against this bill and here are a few reasons why. Raising the age to purchase a firearm to 21 makes no sense, an 18 year old can go to war use firearms to protect their country but they can't purchase a firearm to hunt, sport shoot, or protect their families or themselves because of their age. What good is a locked up firearm if you can't get to it to protect your family or yourself. Going to a safe and fumbling around to open it when the firearm is needed when a criminal breaks into your house could be a death sentence for the person and their family. Not being able to make a or alter a firearm to ones needs or likes is insane not all gun fit everyone if a hunter or a disabled veteran wants to shoot after an injury this law would prevent them from doing so because they can't alter a firearm for their needs. Lastly I believe that the more gun restrictions that are being imposed are not hurting the criminals who commit crimes with guns but they are directly hurting the law abiding citizens of this state. Look at all the laws that are out there for drugs but criminals don't care and they keep doing them. More people die because of drugs then guns everyday. Please don't let this bill go any further than it has already
