

As for commenting on specifics one cannot keep up with the amendments, however I urge you not to support SB978. Speaking in general terms, some amendments will create a patchwork of places where one could legally carry and make felons out of law abiding citizens by simply walking into the wrong public place. Besides that when has there been a problem with a person with a legal carry permit? There are more important issues, don't need to solve problems that does not exist in the first place.

Also the issue of safe storage, that should be a personal choice. This Idea of making felons out of crime victims that had their firearm stolen is just plain wrong.

There was some language in there about reloading, I could not figure out why it was in the definitions section.
