Oregon State Legislators,

I have lived rurally in Western Oregon for over 40 years having opposed the application of toxic herbicides to coast range lands for almost that long. We are at a point in time where our opposition to that archaic practice is being strongly validated. Long dismissed as harmless, the Bayer company manufacturers of glyphosate, have lost two multi-million damage suits in California due to proof of cancer causation. The truth is being revealed on a wide scale that as suspected, these strong herbicides cause sickness, death, nervous and immune system disorders.

When will our elected representatives cease neglecting the health of our citizenry and along with the chemical and logging industries persist in considering us collateral damage in the propaganda war of "jobs"?

Sincerely,
Richard Gross
Deadwood, Oregon 97430
