Thanks for contacting me Remy.
SB 926 is to stop spraying in state forests and SB 931 mandates notification of spraying.

Thank you for entering my comments!
Sincerely,
Deb McGee

Dear Debra,

Good afternoon, I have received your email, but I can't enter it into the public record without a bill number to attach it to. What legislation did you want to comment on?

Best,
Remy Watts

Subject: Spraying Poison

Dear Representatives,

I urge you to support the two bills before you to "Notify" citizens before private corporations poison them for profits and to stop spraying on state owned lands.

The Federal lands have been free from spraying since 1984-why not state lands poison free also?

Eventually, it is my hope that this practice is banned on private lands also.

So many Americans get cancer. My Mom and sister died of cancer.

This really needs to change to protect health and safety of Oregonians.

Sincerely,

Debra McGee
