

Dear Senate Rules Committee,

I am in support of joining other states in a National Popular Vote. The last election has shown how deeply flawed the electoral college has become. Candidates largely pander to the smaller states who have a bigger impact on the election. The current president who lost the popular vote by more than 3 million votes, has created deep divisions in our country and doing untold damage.

I want my vote to count and not be decided for me before I even get the chance.

Please vote YES on SB 870!
