Re: *House Bill 3342 – Plant-based Meals*

Chair Sanchez and Members of the House Committee on Human Services and Housing:

On behalf of Oregon’s 62 community hospitals and the patients they serve, the Oregon Association of Hospitals and Health Systems (OAHHS) has concerns with HB 3342 which requires hospitals to provide plant-based, or vegan, meals any time a meal is served, this includes all visitors and patients.

Hospitals comply with extensive food and dietary regulations under the Centers for Medicare and Medicaid Services, as well as accreditation entities such as the Joint Commission. Under these regulations, hospitals are required to have qualified dietitians, who are trained in the science of nutrition, to supervise the nutritional aspects of patient care.

Hospital dietitians are required to develop menus to meet the nutritional needs of patients in accordance with recognized dietary practices, such as the US Department of Agriculture’s Food and Nutrition Center or the Institute of Medicine Food and Nutrition Board’s Dietary Reference Intakes.

Hospitals are also required under the Joint Commission to accommodate cultural, religious or ethnic food preferences, unless contraindicated. The ‘unless contraindicated’ component of this regulation is important, as physician’s need the ability to assess when a particular treatment or diet may be doing more harm than good. California recently passed a vegan-meal mandate, but the law states plant-based meals must “meet the needs of patients in accordance with their physicians’ orders”.

OAHHS supports the -2 amendment HB 3342, which is a step to aligning Oregon Law with federal standards of practice and focuses on patient care. The piece that is not addressed in the amendments, and we hope to address in the Senate, is aligning to meet the needs of patients in accordance with the providers’ treatment orders.

Sincerely,

Travis Meuwissen
Director of Advocacy
Oregon Association of Hospitals and Health Systems
