

It is my understanding that you will be hearing testimony on SB978 or Dash 1 amendments to SB978, I know that you will have lots of information to hear and read so i will make this short:

The idea behind gun control measures is to make the public safer.... The number of gun related crimes that are committed by law abiding concealed hand gun carriers is almost none.... So why restrict that portion of the population?

What percentage of criminals do you think will follow any new restriction on when and where you can carry a concealed hand gun???

thanks

Carl
