

Hi, I'd like to write my testimony of this bill and Provisions. As I emailed my Senator and or Representatives are we making adults not being able to enjoy the fruits of being an adult? One can leave their parent house at 18, Vote join the military, work, pay taxes and die for this country why can't they and may be a bit extreme but why can't they smoke, drink and now it looks like buy a gun any gun and or ammunition at 18? And why would we allow for such a thing. I am not a eloquent writer like some of the others you see or hear from on here, but I oppose this bill in all it's forms.

And infringement is a trespass democrats and the like will have us believe that as long as it doesn't stop us from buying or owning a firearm then it's not an infringement but that isn't so! As I said and infringement is a trespass as what Webster's dictionary says. And well regulated at the time of it's inception didn't mean what some think to say it means. Well regulated was like a well regulated engine will last for years. In her well regulated mind she deemed the banks deal to be illegitimate. So well regulated means nothing like what we think it means.

The elite would have us believe that all they are doing is keeping us safe while in reality what they are really doing is not just disarming us spiritually but by law disarming us. For 45% or more Americans live paycheck to paycheck, and would not and could not afford all these locks and or other items required by this draconian bill. Nor should we be required by law that is mainly unenforceable unless they plan on deleting the 4<sup>th</sup> amendment as well? Which would not surprise me. It makes people more unsafe than safe because people will fear allowing in friends or other people in their house if this passes, because all it takes is one word from any of them and you're an instant felon or misdemeanor. Our forefathers didn't write in language like: "Shall not be infringed for nothing". When did we become a Democracy? Since when are we able to circumvent the bill of rights just by a mere Majority? I don't remember seeing that or taking part and have been around for a while now. We are a Republic and the Constitution also says all states are to guarantee a Republican form of Govt not Democracy. Once it's allowed to vote away freedoms by a majority then were the same under color of law as a Dictatorship is. So I hope this and all bills like this are rejected.

Thank you.

Doug Powell.
