Dear Chair Dembrow

The birthright of every Oregonian is clear clear drinking water and pure air to breathe. It is the responsibility of every lawmaker in Oregon to ensure these rights for all Oregonians.

I understand the need to prevent conflicting plants when just harvesting a forest. Its the aerial spraying of poisons I dont understand. We have a chance to guarantee safe water for our communities and I would appreciate your help and the help of your committee in achieving this.

Thank you.

Louise Christianson
