

I guess the Oregon legislature is all about providing for shootings safely placed in public buildings; because a person with a paid for CCW permit will no longer be involved with stopping the tragedy, for sake of going to lose everything including freedom.

Oregon legislative morons, to say the least.

I object to this legislative insanity, should it be promoted, like the morons have started the SB 978 and continue.

Clearly a violation of an oath of office; oh, I forgot the weasel clause, "to the best of my ability". So the questionable public votes for this handicap? Not a better explanation so far.

Take this as my notice in advance,, under ORS 30.275, a claim against the morons. No thanks to a lot to you imbeciles in legislative session, your work to disarm this country will be your crutch of failure.

The amendments to SB 978 represents the most extreme attack on Oregon gun owners ever. Among its many pointless and dangerous provisions are the changes to the definition of "public buildings" .

Under this amendment a law abiding Oregonian could become a felon simply by being near a building controlled by any government agency or school.

I urge you to vote no on this extreme attack on our rights.

DL Hitt
