

SB978

I have been following the numerous gun bills that have been written up. It has made me think of a few things that happened.

One was a very elderly man that answered his door at night out in the country, three young men were at his door and saying their car ran out of gas. The trusting elderly man was having them follow him to his shed to give them a can of gas for their car when they beat him badly robbed his home and left him bleeding on the cold ground.

I also had someone outside my home one night. They were trying to break into one of my vehicles when they set off the alarm. About 15 minutes later our neighbors car alarm sounded. We called the sheriff and they came out to look around but saw nothing since there are trees and brush to hide in and they left. About 45 minutes later we heard someone outside our home again and then my vehicle alarm was set off again. This time when we called the sheriff to tell them what was going on and wanted someone to patrol the area the sheriff refused to come back out since they were already there previously and saw nobody at that time.

What good is calling for help if nobody is going to show up to protect someone's family.

Everyone has to have means of proper self defense. We do not support SB978 at all, please vote No on SB978,HB2505,SB275 and No to any other gun control bills.
