Subject: NO to SJM 7 support for Green New Deal

This bill is ridiculous. Even the people who sponsored it like Senators Wyden and Merkley would not stand up and vote to support it in Congress. No, the world is not ending in 12 years and fossil fuels are not evil. CO2 is not a pollutant. The climate cult is like the 17th Century Tulip Mania, people having lost their minds to irrationality. Stop it! Historically the less than 1/2 of 1 percent of the atmosphere which is CO2 is not a disaster in the making. The slight CO2 increase in the atmosphere is greening the planet and Sen. Merkley's description of the climate as climate chaos is just pure poppycock. Supporting this bill is like cutting your nose off to spite your fossil fuel face. Don't support this crack pock piece of junk.
