

Committee members,

My name is Breeauna Sagdal, I'm the Regional Director of Punished4Protecting inc, a national advocate for parental rights, and a Citizen Lobbyist.

The state of Oregon is currently taking more children than it can house, at a rate of almost 50% more children than housing! As a result of this warrantless seizure, children as young as 6 years old are being trafficked across state lines, put into abandoned Prisons and Motel's!
Caseworkers have NO knowledge or understanding of the law, they have NO accountability or oversight, and lie often in thier reports. Police are even required to wear body cameras in dealing with the public, yet these people dealing with children are NOT?!

DHS/CPS is the number ONE pipeline to child sex trafficking! Oregon lost 7 kids shipped to the Clarinda Academy, no investigation has been done, and the governor will not even sit down with Senators requesting information on the topic.

Add to these egregious and disgusting facts, that family court is NOT an actual court of record, affords NO transcripts, operates in the private as a corporation, and there's NO DUE PROCESS for families!

What we need is MORE accountability for an agency that's out of control, with no oversight.... Not more uneducated, caseworkers. There is a valid reason for caseworker turn over, and it's because it doesn't take people long to realize they are NOT helping kids, but hurting them!

I'm attaching several reports that will hopefully help you to see the big picture. Please submit them as testimony. You'll find 2 copied into the body, and 2 attachments. Thank you
