Hello,

I support both SB931 and SB926. As a rural Oregonian I am hoping we can begin to address the dangers of aerial spraying. The points in these bills are finally just the beginning of acknowledging the dangers of any spraying, let alone aerial spraying of toxins on our lands, children, farm animals, pets, wild animals and drinking water.

We need appropriate notification so we can have the time to protect life. Yes, to distinguishing between aerial or ground spraying.

A big YES to Bill 926.....Prohibit aerial spraying on state owned forest lands...for once and for all !

Sincerely,

Linda Kanter

Deadwood, OR
