

Hello! I'm writing to encourage a "yes" vote for HB 2019. Investment in education can and will make a difference for our kids in Oregon! I have a third grader and kindergartner in the public school system in Portland, and we have been fortunate to have reasonable class sizes, art and technology and even some music exposure in their school. We need to keep investing in our schools to allow public schools to provide a quality rounded education for our children, so we are all forced to consider private schools as the only alternative. Please help us!

Thank You,

Aletha & Lincoln Foster
