

To whom it may concern:

We need to fund education adequately! Please support the proposal from the Joint Committee for Student Success (House Bill 3427) to create a \$2 billion investment in our kids and sustainable funding for our public schools.

We need smaller classroom sizes, increased learning time, and more resources available to allow inclusion in the classroom. No child should be ignored because there aren't enough resources to help them succeed. When we make true investments in our children, we improve everyone's future. Our children and Oregon require quality schools and the status quo is NOT GOOD ENOUGH. We can not continue to cut budgets (\$35 million from the Beaverton School district alone). We need a sustainable future.

Senator Hass and Representative Schouten, please show the leadership you were elected for and work towards solving this problem to fund schools adequately and grow public education in Oregon.

Thank you for your time,

Rachel George
Democratic Precinct 384 Committee Person
