

Chairman Prozanski, Vice-Chair Thatcher, and members of the committee, SGS is the world's leading inspection, verification, testing and certification company, with over 97,000 employees and 2,600 locations worldwide.

SGS understands the importance of having strong security measures for internet-connected appliances. Consensus standards are the best way to achieve this by instituting the correct preventative measures. Consensus standards are used across the board in many other areas and are endorsed by governments all over the world to ensure consumer safety and protection.

In the development of HB 2395 it would benefit all to consider consensus standards as a path for reasonable security.

John Ciliege
Consumer and Retail
Global Head of NRTL
