**Subject:** HB 2085

Hello, HB 2085 Regulates construction and removal of dams. I personally will like to see all dams, culverts, and water diversions across Oregon be required to meet ESA fish passage and ESA fish screening criteria. Prohibit mining operations in wild cold water fish waters and streams and any construction building or during the removal of man made artificial barriers that inhibit ESA fish migration in Oregon be required to meet ESA fish passage and ESA fish screening criteria.

The overall benefit to the endangered cold water fish ought to be considered first and as some of the lives considered along every step of every project. Special consideration to meet ESA fish passage criteria pertaining to any and all aquatic hydraulic project proposals ought to come with strict enforcement penalties if not followed.

Thank You  
Ninette Jones
