

This attempt to silence citizens by instituting an overly burdensome duty to personally print out forms is not just absurd, it's a clear attempt to silence citizen opposition to legislative efforts to impose undesirable and outrageous laws- taking away the only effective means citizens have to overturn those overtly egregious laws.

The arguments for imposing these onerous rules for electronic signature petitions have one and ONLY one aim.. to diminish the voice and power of Oregon citizens who are the target of overly aggressive and radically motivated legislators. Nothing more, nothing less.

This effort to restrict an out of control legislature proves just how much that faction of our legislature fears being held accountable for wasteful and radical lawmaking that citizens simply do not support.
