

Dear Senate Committee on Rules,

I am writing in strong OPPOSITION to SB761. This is not what government for the people and by the people looks like. This bill would restrict access for many to be able to be involved in the democratic process - particularly those who are disabled, elderly or low income. I myself do not own a printer as most everything I do is digital and decreasing the use of paper and printer ink is one small way to decrease my carbon footprint. I know many offices in the Capitol building that are paperless as well. This bill is a sneaky way to shut out the public from participating in the legislative process and I am strongly against it. Too much power corrupts and it is up to Oregonians to keep the legislature in check. This bill would weaken the ability of citizens to keep our government in check. Please consider and vote NO on SB761

Sincerely,

Lauren Hartmann
