

Good morning Chair Burdick and committee,

My name is Daniel Martishev and I am writing on behalf of my parents. We are part of the Russian Old Believer community in Oregon. My parents are American citizens and registered voters, they absolutely love politics and stay informed on all current events.

They vote without hesitation because the ballot is mailed to them. If they had to print out their own ballot online, that would hinder their participation because they do not own a computer or printer. Petitions are no difference. This is voter suppression and discrimination against those electronically challenged.

I ask that you vote no on SB761.

Thank you for your time,
Daniel Martishev
