

**SB 643**

**Relating to fuel storage facility compatibility grant program**

---

SB 643 removes a statutory cap on the total amount of money that can be disbursed through the Fuel Storage Facility Compatibility Grant program administered by the Office of Emergency Management.

This grant program provides grants to cardlock facilities to install generator connectors to their fuel storage tanks, to provide access to fuel in emergencies. The recommended amendment removes a cap on the size of the grants, and clarifies that funds provided for the program by the Emergency Board in 2018 be deposited into the Fuel Storage Facility Compatibility Fund for the program's use.

The Public Safety Subcommittee recommends SB 643 be amended by the –1 amendment and be reported out do pass, as amended.
