Hello,

Please vote Don't Pass to HB 2001 A.

This bill is a draconian imposition of zoning change on residential neighborhoods that ignores the qualities of neighborhood livability that existing residents value. Why must the livable qualities of residential neighborhoods of Oregon cities be degraded to accommodate growth? Where are ideas for incorporating residential growth in commercial and industrial zones?

This bill completely tramples on Senate Bill 100. Please remember the fundamental history of Oregon and livability. Oregon has many desirable qualities, must they be sacrificed to accommodate an unending influx of people seeking these desirable qualities?
