

Committee members:

Ostensibly, M49 was intended to bring fairness to existing property owners, and certainty for farmers and others that there would be a limited amount of dwellings and time during which any additional dwellings on resource lands would be built. SB 1050 makes a mockery of that presumed intent and provides unlimited opportunity for wholesale development on our farm and forest lands.

Please drive a stake in this bald attempt to suck some of the remaining blood out of Oregon's land use program.

Thank you.

Robert Emmons, President  
LandWatch Lane County
