

Science show us that this type of loosely called management of wildlife, especially coyotes, does not work and in fact has diverse effects. Besides not solving but creating more issues, we here in Oregon are against this type of so called sport. We are far above the mentality here in Oregon to need blood sports of any kind and that is all this is. I hate to imagine the mentality of those who participate but really hate the idea of this among our young adults and youths, within a culture growing in anger, hate, hostility and aggression towards our citizens and manifesting in our schools. Hunting is one thing, killing contest is a whole other ball game and I would like to think Oregon state government rises above this and sees it for what it is and for what it can manifest. Thank you
