

Hello,

As a widely read and accepted study reports "Intersections are the most dangerous zone for cyclists, whose safety benefits from the freedom to choose the safest time to clear, and to do so more quickly. Bicyclists enjoy vastly superior abilities to perceive and execute a safe yield at a stop than other modes, and great incentive to do so safely." Hence I strongly urge that all be done to move bill SB 998 through and enact it into state law.

Thank you,
