

Please vote yes on SB 998!

As a daily bike rider being able to safely slow down and continue when safe at stop signs makes your ride so much easier. Having to stop when no one is around is just not efficient. Also if there are cars behind you traffic tends to bunch up as I don't move as fast as they do

Again please vote yes but also make sure that this law is enforced as there are bicyclists out there who don't obey the rules and gives all of us a bad name and reputation.

Thank you for your consideration on this matter
