

Dear House Rules Committee,

I used to only bike, everywhere, everyday. I wanted this bill because I personally understood the frustration of killing one's momentum. Now I'm older and I almost never ride my bicycle anymore. I still think it's the best way to travel but perhaps time and convenience has got the better of me. Still I believe that changing the laws to allow cyclists to be more responsible for themselves is the right thing to do. This law has been on the books in Idaho for decades and the bikers and police there both appreciate it.

Please support Idaho Stop. I need the encouragement to get back on my bike!
