

Greetings, my name is Armando. I have been doing some reading on this new law the state is trying to pass. I do have some questions though. Why would the state want to make law abiding citizens into not only criminals but also render them defenseless. This is a very devastating law to read. My mother has parkinsons disease and she relies on her firearm to protect her on early mornings or late night when she walk her dogs. If she is forced to have a lock on her fire arm how do you propose she gets it ready in a scenario where she is being attacked and only has one hand available. On top of that, what if the side of her body that isn't as strong and does act up isn't properly functioning to take this lock off? I also wonder the armed guarded that are following Kate brown for protection or any other official will they be required to lock their guns as well and if not why? Is there life more important than mine? Do they have a better judgeMent on what an attacker is? How far will this go? How many innocent people need to be left helpless or worse dead. I just don't appreciate my rights being slowly stripped away and making it easier for criminals to do harm to innocent people. So please I am begging all of you, do not go through with this insane law it will affect more than you could ever realize.
